D***g

Emitting Color:White Wattage:18W

2 small form factor 18W working perfectly when connected to a driver. Hot 🔥.

T***m

Emitting Color:White Wattage:3W

Good modules, heat up strongly at a current of 280ma, cooling is necessary. Reduced the current to 240ma-they are heated to 50 C, the brightness has not decreased much. Two diodes on the board are unlocked. Wrapped in popper, two weeks delivery. Thank you, I will order again.

Buyer Questions & Answers (11)

Prompt what is the voltage?

300mA current voltage depends on power

What inner hole diameter in the middle of 3W ???

I do not know I bought at 25 wt.
